Gulfco IDW Drums

Hi Gary –

Per our previous conversations, I wanted to let you know that securing of investigative-derived waste (IDW) drums at the Gulfco site was performed yesterday afternoon. The drums were secured by strapping them together in groups of at least two (with typically many more in a group) using ratchet-type tie down strap clamps. As we discussed, all IDW drums are located within the fenced-portion of the Site south of Marlin Avenue. Please let me know if you have any questions or would like additional details.

Thanks.
